

Year 5-8 Continuity Work Groups

Maths Hubs Network
Collaborative Projects 2020/21
NCP20-17

OUTLINE

Work Groups in this project aim to strengthen the transition from primary to secondary school by focusing on curriculum and pedagogical continuity over Years 5 to 8.

Central to the Work Group is the promotion of cross phase communication between teachers to address issues of maths knowledge and learning transition as distinct from pastoral considerations. Whilst many Work Groups will focus on using Multiplicative Reasoning resources, Work Groups can explore any aspect of the KS2/3 curriculum.

HOW TO APPLY

Apply: [On-line application form](#)

Email: peadie@thomas-hardye.net

DETAILS

What is involved?

There will be a series of on-line Work Group meetings with school-based tasks for participants to complete and reflect upon between each meeting.

A lesson study approach is encouraged where all participants focus on a particular aspect of the maths curriculum and work collaboratively to develop this in their schools. Cross-phase classroom observation and discussion of practice is encouraged wherever possible. Participants are expected to consider ways to develop the approaches explored during the project with other staff in their schools.

Who can apply?

Participants should be teachers of Years 5-8 in primary, secondary, middle school and all-through schools who have some responsibility for curriculum development, e.g. primary school maths leads/secondary heads of department.

Linked 'families' of schools are encouraged to take part: ideally teachers from two (or more) secondary schools and some of their associated primary schools will work together.

What is the cost?

The Year 5-8 Continuity project is **fully funded** by the Maths Hubs Programme so is **free** to participating schools.

BENEFITS

Participants and their schools will:

- ✓ deepen knowledge and understanding of the curriculum across KS2 and KS3 and the expectations of pupils at the end of each KS
- ✓ understand the approaches which will support pupils as they move from KS2 to KS3, including the importance of consistency of language and representations
- ✓ make use of common approaches, representations and language across phases
- ✓ develop collaboration between primary and secondary colleagues on issues of curriculum and pedagogy, making them part of the school's transition practice (and policy)

Covid Recovery

The school year 2020/21 will be substantially affected by the impact of the coronavirus outbreak. The knock-on effects on school life and teachers' working lives can't be predicted with any certainty. So, all Maths Hubs work will be flexible and adapt to changing realities. There's likely to be more live online collaboration, often including use of video, for example. In addition, Work Group content will be adjusted to address schools' recovery from coronavirus-related disruption alongside work on the central maths subject matter of each project.

The wider context

The Work Groups in this project promote teaching for mastery approaches across the KS2-3 boundary to ensure consistency in the pupil experience. This addresses two aims:

- (primary) all pupils develop deep knowledge, understanding and confidence, and are well prepared for the secondary maths curriculum
- (secondary) working with schools to address specific challenges in secondary maths teaching through the use of teaching for mastery approaches.

This project aims to avoid the dip in attainment which is often reported as pupils move from primary to secondary education.

Schools from across central and western Dorset are welcome to participate in this Work Group. We have two other Work Groups of this nature, one targeting schools in East Dorset and BCP and the other targeting schools in central/north Devon. Please feel free to contact Phil (see email above) for details of these Work Groups.

Expectations of participants and their schools

Schools must be able to commit to the full academic year's programme. This involves the Work Group sessions listed to the right, as well as classroom and school-based activity. Participants must also be supported by their school leadership to explore outcomes from the project with other colleagues in their school.

Participation is completely free. However, there is no funding available for cover and other associated costs. Work Group sessions have been arranged as twilights to strike a balance between the constraints faced by schools at the moment and the demands placed upon teaching staff.

All sessions on-line:

Launch meeting	Weds 16 th December 1600-1700
WG Session 1	Thurs 14 th January 1500-1700
WG Session 2	Weds 3 rd February 1500-1700
WG Session 3	Tues 9 th March 1500-1700
WG Session 4	Thurs 22 nd April 1500-1700

This Work Group will be led by Phil Eadie. Phil is an experienced Work Group lead, NCETM accredited PD lead Secondary Teaching for Mastery Specialist and is Jurassic Maths Hub lead for Secondary and Level 3.

Please feel free to use the email address above to contact Phil about this or any other Jurassic Maths Hub Work Group.
