

Specialist Knowledge for Teaching Mathematics – Secondary Early Career Teachers

Maths Hubs Network Collaborative Projects 2021/22

NCP21-29

Outline

This project is designed to support secondary early career teachers (teachers in their first two years of teaching) in developing specialist knowledge for teaching mathematics, thus enabling them to understand, teach and support pupils in maths in the classroom.

Details

What is involved?

At a local level, Work Groups will explore one of the following themes:

- designing effective learning and teaching in maths (structure of the number system)
- designing effective learning and teaching in maths (operating on number)
- designing effective learning and teaching in maths (multiplicative reasoning)
- designing effective learning and teaching in maths (sequences and graphs)
- designing effective learning and teaching in maths (statistics and probability)
- designing effective learning and teaching in maths (geometry).

Participants will work deeply on one area of maths, drawing in the associated pedagogy, and activities will include lesson analysis and lesson design. This programme will take place across the equivalent of four days.

Who can take part?

This programme is designed for secondary early career teachers (those in their first or second year of teaching).

What are the benefits?

Participants will:

- ✓ plan and teach a carefully sequenced and coherent area of maths
- ✓ appreciate the key ideas underpinning the area of maths being taught
- ✓ understand key principles and approaches associated with teaching for mastery
- ✓ understand approaches to assess students' prior learning, so that learning sequences take this into account
- ✓ make appropriate use of representations to expose the structure of the maths being taught.

What is the cost?

The SKTM – Secondary Early Career Teachers project is fully funded by the Maths Hubs Programme so is free to participating schools.

Covid-19 Recovery

Many positive lessons were learnt from online collaboration during Maths Hubs activity in 2020/21. These will be built upon in 2021/22.

As the impact of the pandemic hopefully recedes, the result for Maths Hubs work will be a blend of face-to-face activities and frequent online collaboration.

The wider context

'Teachers deserve high quality support throughout their careers, particularly in those first years of teaching when the learning curve is steepest... However, too often, new teachers have not enjoyed the support they need to thrive, nor have they had adequate time to devote to their professional development. The Early Career Framework (ECF) underpins an entitlement to a fully-funded, two-year package of structured training and support for early career teachers linked to the best available research evidence.'

– ECF (Jan 2019)

This project aims to offer high quality maths support for early career teachers, recognising the requirements of the ECF and the impact of Covid on their ITT experience. The ECF underpins what all early career teachers should be entitled to learn about and learn how to do based on expert guidance and the best available research evidence. As is the case for other professions, areas covered in initial training will be covered in greater depth as part of induction as teachers continue their journey to becoming experts. The work in this project will be in line with this, with an emphasis on standards 2, 3 and 4.

Expectations of participants and their schools

Participants and their schools must be able to commit to the full academic year's programme. This is likely to involve some face-to-face activity alongside online collaboration.

About the Hub

The Jurassic Maths Hub supports the training of Maths teachers across Dorset, BCP and Devon:

<https://www.jurassicmaths.com/>

This brand-new course is designed to support Maths teachers in their first two years of teaching. Workshops will take place online initially and then also face-to-face in due course. There will be two collaborative training sessions in the Autumn term which will run from **2:30-5:00pm** on the following days:

Wednesday 22nd September and **Wednesday 17th November**

followed by further sessions in the **Spring** and **Autumn** terms.

Please contact the course lead, **Andy Oldman**, for further information: oldmana@poolegrammar.com

Please express your interest no later than **Friday 16th July** by completing the [online application form](#).

Additional information about the course can be found here:
