

Using Technology to enhance Pedagogy in Statistics for A Level Maths

Stuart Allen, Exeter Maths School

Maths Hub Network Collaborative Projects 2024/25

Outline

Primary focus for 2024/25:

Developing Pedagogy in the use of Technology for Teaching Statistics in A Level Maths

This project provides national support for the effective development of pedagogy in the use of technology for teaching statistics in A level Mathematics, to enhance the quality of teaching and the conceptual understanding of students, and the development of participants as leaders of A level teaching professional development in their own school or college.

It aims to develop and sustain local communities of practice involving collaboration between teachers in developing pedagogy in their teaching of A level Maths.

Details

What is involved?

The content of the Work Group sessions will be influenced by the needs of the participants but may include the following:

- Key themes in statistics in A Level Maths: Randomness, Sampling, Distributions, Hypothesis Testing
- How the Large Data Set and other real datasets can be used to enhance students' understanding
- Designing and delivering inspiring and effective statistics lessons
- The effective use of technology such as Desmos will be embedded throughout the programme
- Evidence-based practice such as spaced practice and retrieval

What are the benefits?

Participants and their departments will:

- be better able to prepare lessons that meet the requirements of the A level (including the overarching themes and the use of technology)
- support colleagues in their own school/college in embedding themes from the Work Group
- be confident using technology to teach the statistics content of A level maths
- be inspired to make statistics a more relevant and engaging part of A level maths

The wider context

There is a range of currently available maths teacher professional development around subject knowledge and pedagogy for new teachers of A level Maths via the AMSP, but no extended professional development for experienced teachers or leaders of A level Maths teaching around the overarching themes, technology or other aspects of pedagogy of the A level Maths specification. There is a strong focus on pedagogy through the overarching themes of the linear A level Maths specification, with changes to pedagogy in statistics teaching, assessment and expectations in the use of technology.

Expectations of participants and their schools

Schools/colleges must be able to commit to the full academic year's programme. This involves a total of three days of face-to-face (or equivalent) support across the academic year, as well as classroom and school-based activity. Participants must also be supported by their school/college leadership to explore outcomes from the project with other colleagues in their department.

Workshop details

Workshops will take place on the following dates:

Date	Time	Location
Thurs 7 November 2024	1200-1600	F2F, Exeter Maths School
Fri 6 December 2024	1315-1530	Online
Fri 17 January 2025	1315-1530	Online
Fri 14 February 2025	1315-1530	Online
Fri 21 March 2025	1315-1530	Online
Fri 2 May 2025	1315-1530	Online

Participation is free for teachers from state-funded schools. Cover expenses will need to be funded by each school, as necessary.
